To: Chief, Private Radio Bureau

WAIVER REQUEST

Telebeeper Connection, Inc. ("Telebeeper") requests waiver of the mileage separation standards of Rule 90.495 (a)(1) to permit frequency exclusivity for its 929.78750 MHz private carrier paging system in Florida City, Miami, North Miami Beach, Ft. Lauderdale, West Palm Beach, Belle Glade and Fort Pierce, Florida.

The configuration of Telebeeper's system is based on the unique topography and population distribution in Southeastern Florida. Population centers are located exclusively along the Atlantic Coast. Moving inland from the coastal population centers one encounters agricultural areas and, ultimately, the Florida Everglades. The land, itself is very, very flat.¹ Outside of cities, multiple story dwellings are uncommon. Private carrier paging stations experience ideal signal propagation conditions in Southeastern Florida. Their reliable service areas far exceed 12½

¹In fact, the higher elevations are along the Atlantic Coast. This coastal ridge prevents water in Florida's interior from flowing to the Atlantic. Instead the Everglades flows South to Florida Bay.

miles.

The paging stations in Telebeeper's Florida City - Ft. Pierce, Florida private carrier paging system are designed to operate as a single integrated system providing continuous paging service from Florida City North to Fort Pierce. Telebeeper is committed to adding any fill-in sites necessary to insure reliable service to customers throughout this service area.

The Telebeeper system was designed to meet area paging needs, using technology adapted to the near-ideal signal propagation characteristics of Southeast Florida. For this reason, cochannel transmitter sites are sometimes located more than 25 miles apart. Telebeeper submits that this fact, alone, should not preclude grant of its 929 MHz frequency exclusivity request.

Telebeeper has demonstrated a serious commitment to private carrier paging in Southeast Florida. Its system exceeds the number of transmitters necessary to qualify for frequency exclusivity. The company is committed to adding any fill-in stations necessary to provide superior paging service to its customers. Grant of frequency exclusivity will protect the large investment Telebeeper must make to develop its 929.78750 MHz system. It will permit the system to add sites in a rational manner. It will promote fair competition between Telebeeper and competitive private carrier paging services obtaining channel exclusivity in its service area.

In view of the foregoing, Telebeeper requests grant of frequency exclusivity for its 929.78750 MHz private carrier paging service at Fort Pierce, Belle Glade, West Palm Beach, Fort

Lauderdale, North Miami Beach, Miami and Florida City. In the alternative Telebeeper requests a temporary or conditional grant of frequency exclusivity subject to construction of sufficient fill-in sites to come into compliance with Rule 90.495 within a reasonable time.
